

## ASBC Approved Methods: Cereals - 3

Calculate moisture in sample by the formula

$$\text{Moisture, \%} = \frac{(A - B) \times 100}{A}$$

### Moisture (International Method)

Weight of sample before drying (g)

Weight of sample after drying (g)

#### Result

Moisture, %

Example:

$$\begin{aligned} \text{Moisture, \%} &= \frac{(5.081 - 4.443) \times 100}{5.081} \\ &= 12.6 \end{aligned}$$
