

## Events

### ASBC Brains & Beer Trivia Night

You bring the brains; we'll bring the beer! Fire up your synapses and dominate the competition at the Saturday night pre-meeting trivia bash! This after-dinner activity is a perfect way to network prior to the meeting kick-off. Make connections, lounge around, and blow your own horn—sing your own praises—and lay it on thick how much better your team truly is. In this spirited game of twisted trivia, may the beer be ever in your favor.

### ASBC Happy Hour

Get outside and enjoy the night sky—and a few light refreshments, while you're at it—during the ASBC Happy Hour at Brewing Summit. Get to know your room (block) mates, pick your favorite poster presenter's brain, and let loose after a busy day.

### Brewing Summit Bayfront Party at Coasterra

Within walking distance of the Sheraton, join your colleagues from ASBC and Master Brewers during Monday night's joint party at Coasterra. Unwind with live entertainment, cold beer, and Mexican tapas from the tip of Harbor Island on North San Diego Bay. Enjoy dessert on the floating barge as the sun dips below the horizon, affording breathtaking views from this open-air venue.

### Afterglow

After the Bayfront Party, join your colleagues for a nightcap with Irish coffee and networking. The Afterglow Party is a conference tradition sponsored by

American Society of Brewing Chemists  
3340 Pilot Knob Road  
St. Paul, MN 55121

### Workshop and Plenary Session

#### Pre-Meeting Workshop

##### Yeast Flavors—From Traditional to Modern Technologies

This workshop will cover all types of yeasts available for brewers to work with and will focus on flavor production. We will be tasting beers made with identical grain bills and fermentation parameters, but made with different yeasts throughout the day. These tastings will provide attendees with hands-on sensory experience while we discuss how far we have come in terms of yeast impacting the organoleptic characteristics of beer and how far we could and should go...

#### Opening Session and Keynote

##### Make Lactic Acid Bacteria Great Again—Malting and Brewing

This presentation gives an overview of the use of lactic acid bacteria in the malting and brewing/beverage industry. It will concentrate on three areas where specific metabolites of LAB can be used to improve the malting and brewing process: isolation and characterization of antifungal compounds from LAB and their application in malting and brewing; the use of specifically selected LAB and their application in reducing the malting loss; and the application of LAB for the production of sour beers.

Elke Arendt  
Professor, University College Cork
